

Petrochemical Simulator

The Petrochemical Simulator is our premium consulting and planning solution. Take full advantage of access to the most comprehensive range of petrochemical industry data ever available to better meet your project and business planning needs.

The Petrochemical Simulator is the only fully-integrated, process-driven, global industry model to improve business planning and decision-making for the entire commodity petrochemical industry – from petrochemical producers, buyers and traders, to financial institutions, technology and logistics providers.

Petrochemical Simulator - Meeting Your Needs

Client use Nexant's Petrochemical Simulator as an integrated planning system that helps align business strategy to petrochemical market developments.

- Optimising resource allocation in a globalising industry
- Planning in uncertain times and understanding risks to competitiveness
- Aligning business plans along and across value chains
- Creating a global outlook owned by your organisation

The Petrochemical Simulator provides fundamental analysis for business planning in areas such as investment analysis, purchasing strategy, cost benchmarking, technology development etc.

All of the above undertaken in the strictest confidence, with full access to comprehensive support as and when required.

Petrochemical Simulator - Benefits

The Petrochemical Simulator is a state of the art simulation model of the entire global petrochemical industry and market. The Petrochemical Simulator uses commodity theory and incorporates over 35 years of historical data and analysis within one proprietary forecasting environment to generate:

- Global supply, demand and trade balances
- Profitability, competitiveness and price projections
- Multi-scenario forecasts to cope with uncertainty
- Stress testing of business plans to optimise resource allocation

Petrochemical Simulator

Petrochemical Simulator License

Subscriptions to our innovative premium service, Petrochemical Simulator allows highly sophisticated analysis and delivers genuine insight into market and industry developments allowing clients to greatly improve their planning and risk management processes.

Multiple scenarios and stress tests are a "must have" in today's uncertain markets to understand the range of possible outcomes and their impact on an organisation's potential.

Time spent on business plans and investment analysis will significantly improve returns on capital expenditure and value obtained from existing assets.

Alternatively, why not use the forecasts based on Nexant's comprehensive range of historic data and three forecast scenarios through a subscription to our Markets and Profitability program.
